Dear Patients,

We are excited to announce that our practice is Reopening on June 2nd!

We hope that everyone is safe and well. It is our priority to create the best possible environment in order to serve all our patients while keeping everyone healthy and protected. We can't wait to get you back on track with your preventative and routine dental care.

Here are some items that we have implemented:

-We have installed state of the art, hospital grade Ultraviolet Light Sterilization units throughout the office. These units will destroy any bacteria or viruses that may be circulating in the air.

-Additionally, each room has medical grade air purification units that filter the circulating air.

-You will notice additional oral suction that our hygienists and dentists will use, as well as extra-oral suction units that will be used for major procedures.

To ensure everyone's safety:

-Please keep your mask on when you arrive into the office.

-Temperatures are being taken for staff and patients daily, with additional hand sanitizer use throughout the office.

-We are trying not to congregate people in our waiting room, so we ask that you do not bring visitors with you so they are not kept in the reception area.

We are implementing all the extra measures so that you can rest assured and feel confident that our office is a safe environment and exceeds the CDC guidelines. Our office has always taken your safety and comfort seriously. You are the most important part of the practice and we look forward to having you back!

Your Dental Team at Barats Family Dentistry
